2 GEOLOGÍA Y GEOTECNIA

2.1 Consideraciones geológicas

De conformidad con lo dispuesto en el artículo 233 de la Ley 9/2017, de 8 de noviembre, de Contratos del Sector Público, por la que se transponen al ordenamiento jurídico español las Directivas del Parlamento Europeo y del Consejo 2014/23/UE y 2014/24/UE, de 26 de febrero de 2014, no se considera necesaria la realización de un estudio geotécnico, debido a las características de las obras contempladas en el Proyecto y al conocimiento que se tiene de la zona:

- Las obras se realizan en una zona consolidada del tejido urbano.
- Se observa en el parque ubicaciones en las que el sustrato rocoso está prácticamente en superficie.
- No aparecen nuevas cargas relevantes. La más importante es un juego de aproximadamente 2500kg con apoyos separados. Se considera una tensión admisible del terreno de 1,5 Kg/cm².
- La cimentación prevista para este y cualquier otro juego está suficientemente dimensionada para las condiciones más desfavorables.
- Se prevé en el control de calidad de la obra la realización de ensayos de carga vertical de suelos mediante placa dinámica UNE103807 en el foso de las cimentaciones y de determinación de la densidad y humedad "in situ" por medio de isótopos radiactivos s/ASTM D-2922. En todo caso, la Dirección de Obra, evaluará la oportuna realización de dichos ensayos.

Para mayor seguridad, se adjunta la información sobre el terreno que aporta la hoja 223 del M.A.G.N.A. Mapa Geológico Nacional, sobre la que se ha identificado la zona de proyecto y en la que se puede observar el tipo de terreno existente en la misma.

2.2 Conclusiones

A la vista de las observaciones in situ y de lo arriba descrito es previsible encontrar un porcentaje significativo de suelos. En concreto la unidad geológica correspondería con facies poco porfídicas de grano grueso. Puntualmente puede aparecer roca metamórfica, para cuya extracción deberán emplearse retroexcavadora con percutor.

Los taludes adoptados en las excavaciones en zanja son 1/10 en roca, 1/5 en tránsito y 1/3 en tierra dura.

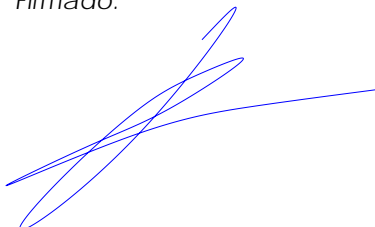

Teniendo en cuenta que las obras se realizarán en una zona verde rodeada de un área consolidada del tejido urbano, que no implican la aparición de nuevas cargas relevantes, se puede considerar que no es necesaria la realización de Estudio Geotécnico del terreno para la redacción del presente proyecto.

En todo caso la Dirección de la Obra, evaluará la oportuna realización de dichos ensayos, en caso de que se presenten inconvenientes en fase de demoliciones.

3 PLANEAMIENTO URBANÍSTICO

Como geometría de partida hemos tomado y adaptado la cartografía digital del Concello de Vigo (Hoja: 7N), a escala 1:1000, la cual no tiene un nivel de precisión ajustado para la realización de los trabajos de redacción de este Proyecto.

Por ello, como complemento a estos datos de partida, se ha realizado un levantamiento topográfico de la zona, por empresa especializada, con un planimétrico y altimétrico de la calle, posicionando la línea del borde límite de la calzada, la delimitación de las aceras y de las líneas de fachada, así como de otros elementos de la misma, tales como las entradas de vehículos a garajes y los registros de los servicios urbanos.

Esto ha permitido, de una forma aproximada, el reflejar las infraestructuras de los servicios urbanos, mediante el cotejo de la información básica suministrada por las principales compañías. No obstante, se remarca el grado de dificultad de dicha reformulación, por lo que se recomienda que previamente a la ejecución de las obras, el contratista de las obras, remita petición expresa de levantamiento in situ a dichas compañías, con objeto de validación de los esquemas de distribución adoptados en Proyecto, y su ajuste en caso necesario.

En el documento de Planos, que se acompaña, vienen reflejadas todas las infraestructuras de la calle de referencia, aportadas por las compañías suministradoras.

El Parque Finca Matías, está geográficamente ubicado en el centro de la ciudad de Vigo, dentro del suelo urbano consolidado según se describe en plano de situación, recogido de los planos cartográficos:

- **Plano 19-24** del PXOM 93 dentro del suelo urbano consolidado SU PERI IV-05. Se adjunta ficha.
- **Plano 7-N**, del Instrumento de Ordenación Provisional (IOP) del 24 de julio de 2019 dentro del suelo urbano consolidado SU PERI IV-05. Se adjunta dicha ficha.

Según el estudio de detalles de la unidad de ejecución VE-PER- IV-05 Travesía de Vigo – Aragón, el parque del Toxal se engloba dentro de las actuaciones del PEPRI IV-05.

El Parque Finca Matías no se encuentra en el Catálogo de Parques y Jardines del Plan General de Ordenación Urbana (PGOU93).

La Ley 2/2016 del 10 de febrero del Suelo de Galicia, y su posterior desarrollo mediante el Decreto 143/2016 de 22 de septiembre constituyen el marco urbanístico autónomo en vigor.

No se encuentran en las inmediaciones ninguna figura de protección medioambiental ni patrimonial
